

Michael McLennan (replacing Gerhard Klimeck in Tues 4:45pm time slot)
nanoHUB.org: Your Workday on Steroids

You have a lot to do every day, and nanoHUB.org is there to support you every step of the way. You might know that nanoHUB has a vast repository of seminars and teaching materials, along with simulation/modeling tools for both education and research. But nanoHUB also has project areas where you can share data with colleagues and work together to draft papers and proposals. nanoHUB has powerful numerical methods that can predict parameter sensitivity and quantify the uncertainty of your results given the variation of parameters in your experiment. nanoHUB can help you build a web presence for your research group, or for that workshop you're organizing. nanoHUB monitors the resources that you share with the community and helps build your impact story. nanoHUB is not just something you visit once in a while for a lecture. It's your workday, on steroids.

Bio: Michael McLennan is a Senior Research Scientist at Purdue University and Director of the HUBzero® Platform for Scientific Collaboration. HUBzero powers nanoHUB.org and 60+ similar web sites involved in cancer research, earthquake mitigation, environmental modeling, pharmaceutical manufacturing, molecular diagnostics, cybersecurity, and many other areas. Dr. McLennan received a Ph.D. in 1990 from Purdue University for his dissertation on dissipative quantum mechanical electron transport in semiconductor heterostructure devices. He worked in industry for 12 years at Bell Labs and Cadence Design Systems building software for computer-aided design before returning to Purdue in 2004.
