

Dr. Khershed P. Cooper is a Program Director in the CMMI Division of the ENG Directorate at NSF. He directs the Nanomanufacturing Program and the Scalable Nanomanufacturing for Integrated Systems Solicitation. He serves as a co-PD for the ERC program. He is a member of NSTC's NSET Sub-committee. He contributes to the development of the Manufacturing USA institutes. Prior to joining NSF, Dr. Cooper was a Program Officer at ONR and a Senior Research Metallurgist at NRL. While at ONR he managed the Manufacturing Science Program and several small business and ManTech projects in various areas of the manufacturing such as additive, micro- and nano-manufacturing and advanced manufacturing enterprise. His research work at NRL was in the areas of materials science and processing, specifically metallic and nanostructures. He is a member of the advisory committee for the Nanotechnology for Defense (NT4D) Conference. He has nearly 150 publications, over 150 invited talks, 70 contributed presentations, one book and one patent. He has organized and participated in several symposia and workshops in additive and nanomanufacturing. He is a Fellow of ASM International and a recipient of its prestigious Burgess Memorial Award.
