

# **Gerhard Klimeck, Prof. Electrical & Computer Engineering at Purdue University**

Gerhard Klimeck is director of the Network for Computational Nanotechnology (NCN) and professor of electrical and computer engineering at Purdue University. His research interest is the modeling of nanoelectronic devices, bridging the gap between material science and device engineering, and impact studies through science gateways. He is a fellow of the American Physical Society, IEEE, and the Institute of Physics. His over 320 peer reviewed papers resulted in a citation h-index of 39 on Google Scholar.
